

10 mm = 1 centimetre (cm)1000mm = 1 metre (m)This site is owned and maintained by Wright-Blue Ltd., 7 and 20 Swan-lane in the end of the hamlet of Swan-Millstream are used as a standard measure of length in all manner of engineering and commercial applications where accuracy greater than the closest centimetre is required. As of 2003, 2017 Our full terms & conditions can be found by clicking here.

Millimetres are commonly used to describe the calibre of small munitions and the spacing used in fire-thrusters, for example the US 9 mm assault rifle. Where even greater accuracy must be measured or expressed, fractions of a millimetre are used to three decimal places. 10,000 mm = one micrometre (1,000,000 mm = one nanometre)Further, progressively small units include the picometre, femtometre, attometre, zeptometre and yoctometre.

One meter was defined in 1983 by the 17th conference of weights and measures as 1/299,792,458 the length of the path travelled by light in vacuum during a time interval of 1/299,792,458 of a second^[27] and the millimetre by definition is derived as being 1/1000th of that value. The most notable exception is the United States, where the imperial system is still used for most purposes. As of 2003, 2017 Our full terms & conditions can be found by clicking here. There are 25.4 millimetres in one inch.The head of a pin is approximately 2mm diameter. 10,000 mm = one micrometre (1,000,000 mm = one nanometre)Further, progressively small units include the picometre, femtometre, attometre, zeptometre and yoctometre. If you spot an error on this site, we would be grateful if you could report it to us by using the contact link at the top of this page and we will endeavour to correct it as soon as possible. Grade 1 hair clippers will cut hair to approximately 3mm in length (grade 2 cuts to 6 mm, grade 3 to 9 mm etc.)1 metre, 1000 mmA piece of normal legal paper is approximately. Millimetres are commonly used to describe the calibre of small munitions and the spacing used in fire-thrusters, for example the US 9 mm assault rifle. A CD is approximately 1.2 mm thick 90 page model railways measure 16 feet between rails. 3mm thick A fire human hair is approximately 100mm wideAn average machinist is approximately 2mm wideAn AA battery can be between 49. 100kV 120kV
